### SWINE FLU & THE DEPOPULATION AGENDA – PART II

**“And I looked, and behold, a pale horse! And its rider’s name was Death, and Hades followed him. And they were given authority over a fourth of the earth, to kill with sword and with famine and with pestilence and by wild beasts of the earth.” (Revelation 6:8) (ESV)**

*Last time out we looked at the looming panic being created by the prospect of a Swine Flu outbreak, the plans being laid to deal with it with a massive inoculation campaign – and we just scratched the surface of what may lay behind the apparent agenda. Though it may seem nuts, as we head into today’s segment recall the conclusion of former Assistant Secretary of Housing Catherine Austin Fitts: “I believe one of the goals of the swine flu vaccine is depopulation”.<sup>1</sup>*

#### MORE THAN MEETS THE EYE

There is something strange going on in the whole way that the campaign to get so much the world vaccinated is being hurried along. Britain is likely to use just a five-day trial before clearing the vaccine for general use.<sup>2</sup> Seeking a “nationwide immunity”, London expects to have all sixty-some million citizens vaccinated within the year. But while national health officials want to make the shots mandatory, resistance is building in the UK. Folks there are aware that the mass vaccination campaign of 1977 in the US resulted in more deaths than the Swine Flu outbreak itself.<sup>3</sup> And they’re not wrong to have their doubts about the safety of the vaccine.

Writing for Newsmax, Dr Russell Blaylock asserts that the vaccine is indeed ‘more dangerous’ than the flu. He points out that the low number of deaths relative to cases in the current outbreak “should not be the basis of a draconian government policy”. Blaylock is one of many voices making the connection between the current virus and the 1918 Spanish Flu and the “possibility that swine flu is a genetically engineered virus”.<sup>4</sup> Even mainstream media like MSNBC has pointed out the similarities between the two viruses, separated by almost a century.<sup>5</sup> Now it must be remembered that there is lots of money to be made by the companies that will get the contracts to produce vaccines for tens or even hundreds of millions of people. Baxter and Novartis are two of the leading contenders. Baxter has the “inside track” with a vaccine that contains Celvapan, an ingredient with a history of transmitting contaminated viruses like HIV. They also have two recent and deadly scandals under their belt. A vaccine for hemophilia was distributed with components of the HIV virus. “Baxter continued to release the HIV contaminated vaccine even after the contamination was known.” That was in 2006. More recently, - and ominously perhaps, - earlier this year, the company shipped a seasonal flu vaccine with the bird flu virus to 18 countries. If it had not been caught by local authorities, it would have been the cause of a global pandemic.<sup>6</sup>

Even CBS 60 Minutes ran a story on the dangers of the 1976 Swine Flu vaccine campaign. There was only one death from the flu that year, - but about 300 from the vaccine. Thousands more are suing the government for damages from the faulty inoculations.<sup>7</sup> But tainted shots did not just start in the 70’s. There is increasing evidence dating back several decades that the Spanish Flu was spread due to the vaccination itself. Yes! There is increasing evidence that it was the vaccine that caused the spread of the deadly influenza that followed WWI. “The army doctors knew all these cases of disease and death were due to the vaccination and were honest enough to admit it in their medical reports.”<sup>8</sup> Writing in 1977, Dr Eleanora McBean, - a young witness to the 1918 events, - described her conclusions from the evidence she had seen. Writing of the 70’s outbreak of swine flu and the efforts to control it through a vaccination program, she concluded: “Therefore, there will be no swine flu

epidemic unless the vaccine promoters make one like they did in the 1918 flu epidemic. It will not kill 20,000,000 people unless the people submit to the disease-producing shots.”

Here is some more of what she had to say. “All the doctors and people who were living at the time of the 1918 Spanish Influenza epidemic say it was the most terrible disease the world has ever had. ...As far as I could find out, the flu hit only the vaccinated. Those who had refused the shots escaped the flu. My family had refused all the vaccinations so we remained well all the time. There was seven times more disease among the vaccinated soldiers than among the unvaccinated civilians, and the diseases were those they had been vaccinated against. One soldier who had returned from overseas in 1912 told me that the army hospitals were filled with cases of *infantile paralysis* and he wondered why grown men should have an infant disease. Now, we know that paralysis is a common after-effect of vaccine poisoning. Those at home didn't get the paralysis until after the world-wide vaccination campaign in 1918.”<sup>9</sup>

And a worldwide, mandatory vaccination scheme is just what the World Health Organization has in mind. On July 13<sup>th</sup>, a WHO panel recommended such a course of action for all of its 194 member nations. That committee was stacked, - *coincidentally I'm sure*, - with big wigs from the world's largest vaccine manufacturers; - Baxter, Novartis, etc. The program they envision would begin by targeting millions of health care workers in each nation.<sup>10</sup> But the craziness doesn't stop there. By April of this year, the story was spreading that the Swine Flu was a “synthetic creation”, cobbled together in a laboratory, in what Paul Joseph Watson called in an Infowars headline; “A Deadly Mix of Never Before Seen Viruses”.<sup>11</sup> Dr A True Ott explains that this year's version of the Swine Flu “is actually a recombinant, or ‘split-influenza’ virus consisting of A-strain Bird-Flu (H5N1), Swine Flu (H1N1) and multiple strains of human flu (H3N2)”, - just like the 1918 strain that killed tens of millions. Further, the vaccine manufacturer Novartis applied for a patent to fight such a ‘novel’ ‘split influenza’ virus back in 2005, - even before the appearance of this current strain. However that was after the reverse engineering of the 1918 virus, - that so closely resembles the genetic make-up the Swine Flu strain now circulating.<sup>12</sup> Add to this the curious fact that the companies that are to manufacture the vaccines for global consumption, - including Baxter, Novartis and others, - have now been protected against law suits for any resulting deaths. And some estimates have said that as many as 60% of those who take the vaccine could be victims.<sup>13</sup>

Now what is in the vaccine is even more frightening! Included in the ingredients are some substances that have a proven history of causing severe health problems. First there is Squalene. This ingredient has been linked to Gulf War Syndrome. Here's the skinny on Squalene from Natural News. “Squalene contributed to the cascade reactions known as Gulf War Syndrome that left GIs with arthritis, fibromyalgia, lymphadenopathy, photosensitive rashes, chronic fatigue, chronic headaches, ulcers, dizziness, weakness, memory loss, seizures, mood changes, neuro-psychiatric problems, multiple sclerosis, lupus, and other diseases.”<sup>14</sup> Other ingredients include dangerous levels of mercury and something called thimerosal, - “50 times more toxic than mercury”, - which can cause long-term immune, sensory, neurological, motor, behavioural dysfunctions”. The shots will also contain a live, though weakened form of the Swine Flu virus that exists the host through feces, mucous etc, into our sewage drains. Dr Mike Schamp believes this “mandatory vaccination plan will surely cause the pandemic and not solve it”. And sources indicate that any clinical trials will be conducted by the companies themselves, - under “secret contract” with the Department of Health and Human Services. That's the program that the World Health Organization wants every American over the age of 6 months to sign up for.<sup>15 16</sup> In any case, we seem to be heading into some very dangerous territory.

*With the similarities between the Spanish Flu and the Swine Flu of today, what we are seeing may be just a replay of the 1918 tragedy in more ways than one. Yet there is perhaps something even more sinister behind the curious evidence we are uncovering. We can find that evidence in the statements given and policies enunciated over the last several decades by global organizations and statesman from America and around the world. The reality is both extremely frightening and surreal. And that's just what we will begin to explore next time.*

## TRACKING BIG BROTHER

We know that when Antichrist comes, he will rule over a world system that will seek, - and pretty much achieve total control of the entire population. We have seen the technology to achieve such a scenario pretty much come of age in the last several years. Here's how Revelation 13:16 describes that phenomenon. **“And he causeth all, both small and great, rich and poor, free and bond, to receive a mark in their right hand, or in their foreheads”** (KJV) Now Bible commentators have disagreed whether this will be a physical mark, - (tattoo-like perhaps), - that will identify the bearer with the satanic worship of the antichrist, the **“beast”**<sup>17</sup> (see Revelation 13:12 & 15) or whether it will be an implantable chip that would tie in to a totally controlled and cashless global culture that would fulfill the requirements of Revelation 13:17. **“And that no man might buy or sell, save he that had the mark, or the name of the beast, or the number of his name.”** Oliver Greene, writing in the 1960's, before the development of the biochip, wrote: “I believe there will be three sixes tattooed on foreheads and right hands”.<sup>18</sup>

On the other side of the coin we have growing evidence of a giant move – by governments across the globe – to step up security and tracking of their subjects. Just witness the explosion of cameras and microphones and implantation of chips into products that allow them to be traced via GPS. Then at the 2008 meeting of the Bildebergs, - a gathering of the most elite and powerful of the elite and powerful, - it came out that the Illuminist / New World Order group was, - in the words of Prison Planet's Paul Joseph Watson, - “discussing the microchipping of humans on a mass scale, which would be introduced under the pretext of fighting terrorism whereby the "good guys" would be allowed to travel freely from airports so long as their microchip could be scanned and the information stored in a database”. It would be pushed as a tool in the fight against terror as well as for universal storage of medical records.<sup>19</sup> But the move toward a New World Order is not limited to the chipping question. Here are some of the other developments on the horizon.

- Headline in the Times of London: “India to issue all 1.2 billion citizens with biometric ID cards”. They call it “the biggest Big Brother project yet conceived”.<sup>20</sup>
- Researchers used Blue Tooth – the radio chip that is replacing cable-borne information technology to trace the movement of “tens of thousands of festival goers” at an event held in Belgium. They utilized 36 Bluetooth scanners to follow Bluetooth users as they wandered about.<sup>21</sup> *Yeah, I feel safer.*
- Tiburon California outside of San Francisco, is installing cameras that will record the license number of “every vehicle that crosses city limits”.<sup>22</sup>
- Hate Crimes legislation is being attached to a military appropriations bill as a way of sneaking it through Congress. A pastor could be targeted for prosecution if he preached a sermon against homosexuality, - even if he just quoted from the Bible, - if someone claimed a link between his sermon and the attacker. [An amendment to “clarify” that Bible reading would not be prohibited was defeated”. Further, Attorney General admitted that the law would only apply to “protected groups” such as homosexuals and blacks, - and pointedly not apply to Christian ministers. A ‘gay blade’ who attacked such a minister would not be subject to the law. There are a couple of major problems with hate crimes legislation. The Christian Science Monitor points out that for one, it is redundant. Violent crimes are already “prosecutors to the fullest extent of the law”. Secondly, making the ideology of the perpetrator a centerpiece of the trial doesn't deter like-minded extremists; it encourages them.<sup>23 24 25</sup> Hate is not about fairness, - it is about control and the advancement of a radical, leftist agenda that will alter the culture and ethic of this nation.
- The Bureau of Alcohol, Tobacco and Firearms has informed the states of Montana and Tennessee that their laws will be overridden by the Bureau where they diverge from Federal policy. This is direct contradiction of the Tenth Amendment which preserves the power and jurisdiction of the states over all matters not specifically delegated by the Constitution. Here's the text of that Constitutional amendment. “The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people.”<sup>26 27 28 29</sup>
- HR 45, otherwise known as the ‘Blair Holt’s’ gun control act, was introduced before Congress. This legislation would require a Federal license for handguns and semi-automatics, - require that the weapons

be stored in such a way that they could not be used for home or self defense, - encumber private sales with mounds of paperwork and allow for Federal agents, acting on behalf of the Attorney General to conduct warrant-less inspections of anywhere a weapon is stored, - (your home for instance), - to insure compliance with the law.<sup>30 31</sup>

- Food Control! Yeah, food control! It's on the agenda and it's making headway through this very liberal Congress. The bill HR 2749 has surfaced and some of its provisions are downright scary. Should this become law the FDA would be empowered to regulate crops from planting to harvesting. (It's interesting to note here that Agri-giant Monsanto had a "defining" influence in how the bill was written.) "Good farming practices" mandated by CODEX and the World Trade Organization, could in the words of one publication, eliminate "organic farming by eliminating manure". At the same time it would mandate genetically modified animal feed, certain drugs, petrochemicals and fertilizers. Food would be tracked everywhere along the chain from farm to market. Bill HR875 would have regulations apply to all types of what it refers to as a "Food Production Facility" which could easily be extended to take in home gardens that did not comply with the Federal regulations. In addition, HR2749 would be empowered to make 'random warrantless searches' of family farmers and small, local food producers 'without any evidence whatsoever that there had been a violation'. Then there's this craziness. The bill would allow the FDA to quarantine entire geographic areas, restricting the movement of "any vehicle being used or that has been used to transport or hold" food. One author smartly asks if that would include family vehicles that had ever transported groceries. The same author wonders whether the legislation would just give the government another tool with which to call for, - and justify martial law based on some food emergency.<sup>32</sup>  
33 34
- Finally there's Health Care. This is another back door toward total government control. The current proposals will shift the balance of power away from individual control and toward Big Brother-like micromanagement of every aspect of our lives. In an article picked up by the Canada Free Press, Alan Caruba detailed by page, some of the most egregious and damning elements of the bills currently sitting before Congress. Here are some examples of what's on the table: "Mandatory audits of employers that self-insure", health care rationing, a bureaucratic committee will determine "treatments and benefits", all illegal aliens, - (around 12 million) will be covered, "The federal government will have direct, real-time access to all individual bank accounts for electronic funds" – the federal government will have access to all personal and financial records, employers must cover part-time workers, the government will set doctors wages – moving toward equality in pay between GPs and specialists, doctors and hospitals will face financial penalties for treatments that don't work and result in a "readmission", the government will control 'end of life treatment' – and will define and ration mental health services.<sup>35</sup> Unless amended, the pending legislation will open the door for taxpayer funded abortion on demand across the entire nation, - when it hands the definition of benefits to committee's established after passage of a bill. Critics point out that this is a stealth means of passing the Freedom of Choice Act, "which would strip states' right to limit abortion", and provide federal funding.<sup>36</sup> The AP confirms that the legislation now before Congress would allow for the coverage of abortion.<sup>37</sup> What's more, government will eventually become the primary healthcare provider, driving private firms from the field. In that way the new health system will follow the path being blazed by banks and the financial sector and the auto companies, bowing to increasing government control of corporate America.

These are just some samples of the onset of a frightening pattern of quickly increasing government control in so many areas of our lives; - on both a national and global scale. It is just what we were promised, when we were promised change. And according to Scripture, this is just what the New World Order will bring us, when the figure called the Antichrist takes over during the coming tribulation.
